

project name	Heidelberg University Hospital Firewater and wastewater for helipad		
owner	Heidelberg University Hospital		
consultant civil works	Ing.-Büro J. Schmeykal, Stuttgart (Germany)		
location	Heidelberg (Germany)		
project duration	begin	april 2010	
	end	fall 2010	

water + sanitation
featured projects

The helipad at University Hospital Heidelberg is to be extended. This requires extension works of the existing firewater supply system for fire hydrants and foam systems and the new construction of combined wastewater conduits.

access to helipad with hydrant

responsibilities

Design, specification writing and site inspection of hydraulic works for water supply and wastewater:

- new firewater pipeline (PE100 DN125 (5"))
- new combined wastewater sewer line (PE100 DN300 (12"))
