

project name	Design Development of Corniche and Preliminary Design of Boulevard Road		
owner	Ministry of Culture and Tourism, Baku (Azerbaijan)		
principle consultant	Albert Speer & Partner, Frankfurt (Germany)		
location	Baku (Azerbaijan)		
project duration	begin	october 2006	
	end	april 2007	

Baku, the Capital of Azerbaijan, possesses a 4.5 km (2.8 miles) long esplanade on Caspian Sea shore. This park is the most important green and recreational area and an important element of urban planning for the Metropolis.

The park development started after World War II, on reclaimed land, for recreation and flood protection. However, the park is deteriorated and does not offer sufficient flood protection.

The project aims to improve the conditions and to develop a contemporary urban and landscape design and to improve the conditions of the utilities and transport.

responsibilities

design of new construction and restructure, modernization, improvement, restoration existing of lines and structures:
